EXPERIENCE

Amazon

August 2025 - Present

Software Dev Engineer

San Diego, CA

- Designed and deployed an end-to-end **AI-driven automation framework** using **Amazon Bedrock** and **AWS Lambda** to autonomously detect and remediate dashboard anomalies, streamlining On-Call operations and reducing manual triage workload by over **20%**.
- Engineered and deployed a scalable **Pipeline Build Fixer Service** in **Java** on **AWS (ECS, Lambda, CloudWatch)** to automate build recovery workflows across fraud prevention systems. Integrated the service into the internal **Tool Catalog** for organization-wide adoption, reducing manual recovery effort by over **25%** and improving CI/CD reliability.
- Elevated Tier-1 service reliability for the core **Inline Plugin** by proactively identifying and resolving critical latent defects impacting the customer checkout flow, reducing **PagerDuty alerts** by **15%** and improving end-user transaction stability.

Goldman Sachs

May 2025 - August 2025

Associate Software Engineer

Salt Lake City, UT

- Engineered Callisto, an eventually consistent **distributed system** for multi-million USD trade automation in equity risk management using **Java**, **React**, and **Kafka Streams**. Optimized high-throughput, **multithreaded workflows** to ensure data integrity across global trading systems.

Airtel Digital

January 2021 - July 2023

Software Engineer - Full Stack

Gurugram, India

- Developed and maintained high-performance **Java Spring Boot** microservices with rigorous unit testing, achieving **95% code coverage** and reducing production bugs by 20%.
- Led backend modernization using **Docker**, **Kafka**, and scalable data pipelines, improving API response times by **40%** and driving 15% higher user engagement.
- Spearheaded integration of **100+ partner products** into Airtel's Digital Store through cross-functional collaboration, increasing **customer acquisition** by 20%.
- Built a **lead delivery system** and revamped infrastructure with **Aerospike** and **Terraform**, cutting lead transfer time by 50%, reducing latency by **30%**, and improving uptime by 20%.
- Developed a self-serve integration tool using **Java Spring Boot** and **Docker**, streamlining third-party onboarding for Airtel Digital Store and reducing integration time by **50%**.
- Engineered scalable **RESTful APIs with MongoDB** and implemented real-time monitoring via the **ELK Stack**, improving reliability with **99.9% uptime**, cutting order failures by **25%**, and boosting system stability by **30%**.

TECHNICAL SKILLS

- Languages:** Java, Python, Golang, C, C++, JavaScript, Typescript, SQL, Shell Script, MATLAB
- Frameworks:** Java Spring Boot, React, Scikit-learn, NLTK, Numpy, TensorFlow, Keras
- Cloud, DevOps Tools:** Docker, Kubernetes, Terraform, Jenkins, CI/CD, Azure, AWS, Oracle Cloud Infrastructure, HPC
- Big Data and Streaming:** Apache Kafka, ELK Stack (Elasticsearch, Logstash, Kibana), RabbitMQ
- Software Development:** Agile Methodologies, Software Development Lifecycle (SDLC), Object-Oriented Programming
- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional:** Issued July 2024
- Microsoft Certified: Azure Developer Associate:** Issued November 2024
- AWS Certified: Amazon Web Services Developer Associate:** Issued January 2025

PROJECTS

Aero-Flow (high speed data streaming)

Apache Kafka, MongoDB, Java Spring Boot

- A high-throughput, **low-latency** Java Spring Boot microservice. Streams data via Apache Kafka optimizing the production to consumption flow. Used MongoDB for **data persistence** and Aerospike for **fast lookups**.

ModernStack-ETL (a modern ETL pipeline.)

Apache Airflow, Snowflake, dbt core, Astronomer

- An ETL pipeline using dbt, Snowflake, and Apache Airflow. Transforms raw data into **analytics-ready** fact and **dimension tables**, automating data transformation, testing, and orchestration for **scalable, high-quality insights**.

CapsNet (bird classification with Capsule Network)

Python3, High Performance Computing

- An **advanced classification** system for 200 species of birds, using a Capsule Network (CapsNet) expanding a preexisting CNN. Improved accuracy by leveraging CapsNet's ability to recognize spatial hierarchies, relationships.

EDUCATION

University of Utah

Salt Lake City, Utah, USA

- Masters of Science - Computer Science; GPA: 3.8/4*

August 2023 - May 2025

Indian Institute of Information Technology Allahabad

Allahabad, India

- Bachelor of Technology - Information Technology; CGPA: 8.2/10*

July 2017 - June 2021
