EXPERIENCE

Amazon Web Services

August 2025 – Present

Software Development Engineer – Agentic AI, Amazon Quick Suite

Bellevue, WA

- Designed and launched an **action execution service** for Quick Suite’s AI agents – from scratch to GA in 5 months as **sole owner**, built on **Lambda**, **Smithy**, and **CDK** across **7** production regions.
- Scaled the platform **300x** (100 to 30,000 TPS) ahead of launch: authored the load-test design with a Principal Engineer, resolved 10+ bottlenecks across DynamoDB caching, ECS fleet scaling, and throttle tuning, and uncovered a latent critical **cryptographic offloading failure** fixed across **5 services**.
- Shipped **20+ agent connectors** (Google Drive, OneDrive, SharePoint, Zoom, Microsoft Teams) and **MCP** integrations, enabling tool calling for **hundreds of thousands of users**; automated connector onboarding, cutting partner integration from **2 weeks to under 1 day**.
- Delivered a **connector version-upgrade system** with **Step Functions** rollout safety gates and SNS-driven automation, migrating **500+ live customer connections** across all 7 regions with **zero downtime**.
- Owned production reliability: eliminated **115,000+ daily errors** in the Quick Suite Webcrawler (**80%** fewer customer escalations), built an AI-driven **anomaly detection** framework with **Amazon Bedrock**, cutting manual on-call triage by **20%**, and resolved **10+ recurring** weekly high-severity issues.

Goldman Sachs

May 2025 – August 2025

Associate Software Engineer

Salt Lake City, UT

- Engineered an eventually consistent **distributed system** for multi-million USD trade automation in equity risk management using Java, React, and **Kafka Streams**, optimizing high-throughput **multithreaded workflows** for data integrity.

Airtel Digital

January 2021 – July 2023

Software Engineer

Gurugram, India

- Led backend modernization using **Docker**, **Kafka**, and scalable data pipelines, improving API response times by **40%** and driving **15%** higher user engagement across Airtel’s digital platform.
- Built a **lead delivery system** end-to-end and revamped infrastructure with **Aerospike** and **Terraform**, cutting lead transfer time by **50%**, reducing latency by **30%**, and improving uptime by **20%**.
- Spearheaded identification, onboarding, and integration of **100+ partner products** and services into Airtel’s Digital Store catalog with 10+ external partners, increasing customer acquisition by **20%**.
- Developed **RESTful APIs** in **Java Spring Boot** microservices with **MongoDB** and real-time **ELK Stack** monitoring, achieving **95% test coverage**, **99.9% uptime**, and **25%** fewer order failures.

TECHNICAL SKILLS

- **Languages:** Java, Python, Golang, TypeScript, JavaScript, SQL, C/C++, Shell
- **AWS:** Bedrock, CloudWatch, S3, IAM, KMS, CloudFormation
- **Frameworks:** Java Spring Boot, React, Smithy, TensorFlow, Scikit-learn
- **Databases:** DynamoDB, MongoDB, Aerospike, PostgreSQL, MySQL
- **DevOps & Infra:** Docker, Kubernetes, Terraform, Jenkins, CI/CD
- **Streaming & Observability:** Apache Kafka, RabbitMQ, ELK Stack (Elasticsearch, Logstash, Kibana)
- **Certifications:** AWS Developer Associate (2025), Azure Developer Associate (2024)

EDUCATION

- **University of Utah** Salt Lake City, Utah, USA
Master of Science – Computer Science; GPA: 3.8/4.0
August 2023 – May 2025
Courses: Advanced Algorithms, Computer Architecture, Machine Learning, Operating Systems, Computational Geometry
- **Indian Institute of Information Technology Allahabad** Allahabad, India
Bachelor of Technology – Information Technology; CGPA: 8.2/10
July 2017 – June 2021
Courses: - Design And Analysis Of Algorithms, Operating System, Deep Learning, Linear Algebra.
